

Model Building

Test The Model

Date	16 November 2022
Team ID	PNT2022TMID34036
Project Name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

Test The Model

❖ Evaluation is a process during the development of the model to check whether the model is the best fit for the given problem and corresponding data.

❖ Load the saved model using load model.

Predicting our results

```
1 | from tensorflow.keras.models import load_model
   | from tensorflow.keras.preprocessing import image
   | import numpy as np
```

❖ Taking an image as input and checking the results.

```
[ ] img = image.load_img("/content/drive/MyDrive/colab Notebooks/Dataset/151_561/BANANA/102_100.jpg",target_size=(64,64))#loading of the image
   | img
```

❖ By using the model we are predicting the output for the given input image.

```
[ ] labels=['APPLES', 'BANANA', 'ORANGE', 'PINEAPPLE', 'WATERMELON']
   | labels[np.argmax(pred)]
```

```
'BANANA'
```

❖ The predicted class index name will be printed here.
